# ABOUT US

As the world is moving toward healthy and organic products, coconut related products have seen a huge surge in usage within recent years. Although the demands keep increasing, the supply of coconut products is very limited. Viet Nam, with the advantages of large copra nut area, is currently one of the tenth most productive countries in term of related products.

Realizing the big market opportunity, Viet Nam geographic advantages and the concerns of the local, Asia Ingredients Group (AIG) - a Vietnamese expert in manufacturing food additives – has decided to join this growing market with the establishment of Asia Coconut Processing (ACP) on 19/12/2014, a manufacturer which specialized in providing high quality products, using the latest technology.

ACP also has acquired many certificates for quality, including: FSSC 22000, HACCP, HALAL, KOSHER, USDA & EU ORGANIC; and exported to more than 40 countries across different regions.

# OUR FACILITY

## 2.1 DESICCATED COCONUT

Applying modern drying technology in ACP, Desiccated Coconut creates a delicious and fatty flavor, and nice odor with typical milky white color to meet the high standard of markets namely: Europe, America, Japan.

## 2.2 COCONUT CREAM

Coconut cream is extracted from white coconut meat without additives, preservatives, then pasteurized and kept chill or frozen afterwards to preserve the original nutrition and flavor of the coconut.

## 2.3 COCONUT MILK POWDER

Implication of modern European technology and Denmark's spray-dried production Coconut Milk Cream has white color and odor of natural coconut. The fat varies from 30% to 65% according to customers' demands
