## PRODUCT STORY

### "SOFT DRIED SLICE MANGO AND OTHER PRODUCTS"

Which mango is as delicious as Cao Lanh mango, Now "Soft dried mango" has become a delicately processed product of modern knowledge, a convenient substitute for fresh mango and a new choice of the line of Snacks for many ages. The product is the pride that promotes the indigenous values of Cao Lanh mango, Dong Thap.

"Soft dried mango" of Viet Duc Food Technology Co. , Ltd. is produced by the leading advanced cold drying method of German technology, still retains 100% of the natural sweetness and flavor of fresh mango. one way to ensure product quality safety until shipped. The product is the result of the Company's enthusiasm with the association of cooperatives and households producing mango under VietGap standards on an area of 150 hectares of alluvial and green land; to produce a unique product with high quality reputation and conquer the demanding export markets of Japan, Germany and Russia,etc...

"Soft dried mango" - Eating is enchanting, with a strong taste of Vietnamese. The product is very good for your health, supports to increase energy for the body.

To meet the increasing demand for soft dried fruit products for domestic and foreign markets, as well as we understand the health value that soft dried fruit products bring to consumers. In addition to Mango products, Viet Duc Company has produced and diversified soft dried fruits products such as: Pineapple, Dragon fruit, Jackfruit, Banana, Papaya, Ginger . . . All the soft dried fruit products of Viet Duc is pure, contains many vitamins, minerals and fiber, has a natural sweet taste, completely does not use preservatives and colorants, no chemicals, no GMO and Cholesterol. It 's high quality, ensures food hygiene and safety, is very good for all consumer health.

**TECHNOLOGICAL PROCESS**

This is the production line imported from Germany with the most advanced automatic technology currently in accordance with European standards.

The principle of operation is to dry raw materials by heat to produce products according to the moisture content which is automatically adjusted in many different levels depending on the requirements of the market. Due to the use of electricity to generate heat, other fuels such as firewood, gas or other fossil fuels are not used, so it does not pollute the air and is easy, fast, and absolute precision in adjusting the required heat.

**MATERIAL AREA GAP**

The Mekong River Delta is an area of abundant agricultural raw materials, sufficient input supply for the factory is stable so it is very convenient for investment and project development.

For the output of the product, the soft dried fruit can satisfy both domestic consumption and export demand. The main export markets are the EU, Japan and Korea, which require high product quality but high stability. With the most modern and advanced technology line currently imported and technology transferred from Germany, the project's products will meet the needs of these markets.

## CERTIFICATES

The soft dried fruit products of Viet Duc Company have been granted the Certificate of High Product Quality, ensuring food safety and health and ensuring the health of consumers such as: HACCP, ISO 22000- 2018, HALAL, SGS...
