5	Bamboo straw								

With huge material sources from man-made forests, we can produce and supply in large quantity as 100 containers per month. With our experience and profession in production, we can produce and make packing as customers' requirements. Our products are tested by TUV and meet FDA, LFGB requirements.

Our TD wooden straws are made from trees grown in man-made forests. Nowadays, man-made forests are planted very quickly and plenty. Due to different characteristics with natural forest, man-made forests need to be harvested to continue their nature cycle of life. Therefore, buying products made from trees in man-made forest is a very good way to preserve forests.
