OUR CERTIFICATE

MATERIAL'S ORIGIN

More than 100 tea, cocoa, coffee, and cashew lines are processed, exported, and supplied by Ha My Corporation.

The spearhead industry is known as cashew nuts. In the case of cashews, there are 15 instant product lines, including cocoa roasted cashews, cinnamon, ginger, and fresh & salty vegetarian cashews, in addition to cashew nuts exported as raw materials for processing milk seeds, chocolate, spices, and so on..

The firm has constructed its own material zone. In Binh Phuoc Province, cooperatives are being established.

For geographical indication material areas, 500 hectares of cashew have been connected with cooperatives. Thousands of hectares will be available in the future.

In addition, for commercial purposes, we purchase products from other suppliers in Binh Phuoc and other parts of the world. The company actually only imports goods from Cambodia when it comes to imported goods. When purchasing goods, care is taken to ensure that they are of high quality.

HAMY'S OFFICE

Ha My Corporation is located in Ha My industrial cluster, with a total area of approximately 13ha. There is a solid and complete infrastructure in place. Ha My Corporation always wants to invest in modern equipment and technology from factory system, processing and environmental storage in order to provide a competitive advantage and offer high quality products. Green-clean-a beautiful place to work.

Our office is located in the Ha My Industrial Cluster. With thousands of office square meters, airy to manufacture and business fully equipped.

Personnel: including approximately 30 key staffs, have many years of experience in the production of cashew. From the start of its birth, stick with the company. Often the team is trained and takes classes on the strategy of the company. The company innovates to ensure that the enterprise grows every day.

THE SYSTEM OF

WAREHOUSE & FACTORY

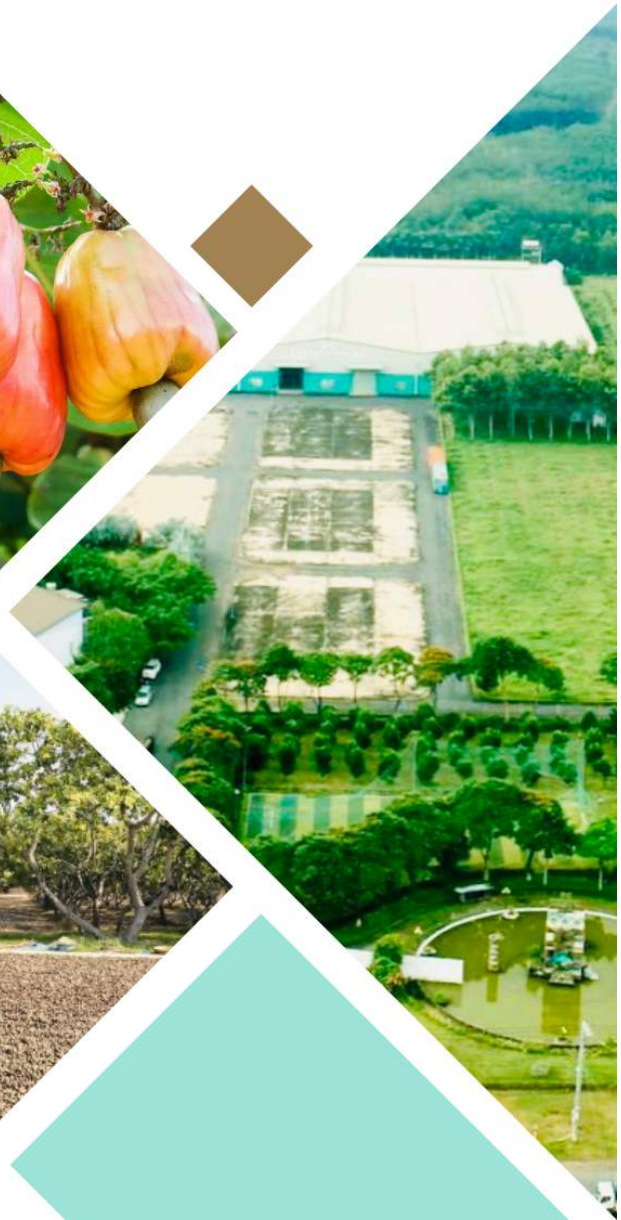

The system is designed to produce and process cashew nuts: Line of processing, technology of processing, quality standards:

- ❖ From the drying yard to the final product there is a complete white cashew processing line. In particular, the classification of drying yard, damping, division, drying, silk peeling, classification. We export white standard BRC kernels – high food industry standards and rigor.
- ❖ Cashew nuts roasted with full system from: splitting - sorting - roasting - packaging - labeling - stamping date - sealing goods - carton packaging. BRC, ISO and food safety and hygiene are built in accordance with international quality management standards HACCP.
- ❖ Milk seeds: line of production, technology of production, standard Quality of output: The project is underway.

CAPACITY FOR PRODUCTION

The factory is able to generate 50 tons of raw materials daily. Equivalent to approximately 13 tons per day of white kernels.

The company can produce 10 containers of salt & spice products monthly, 30 containers of white filling per month including production and trade.
