Test Report No.: 248143992

1. Executive Summary

Test Method: It is evaluated if the value of the total incident lighting level and/or illuminance exceeds the specified, category-dependent illuminance or not and/or if the product category-dependent illuminance is reached or not.

For the purpose: The test method aims to determine the product under test whether the declared illuminance is achieved. Additionally, the test method can be used to verify the declared illuminance level of the product. The test method is designed to be used for the purpose of determining the illuminance level of the product. The test method is not intended to be used for the purpose of determining the illuminance level of the product.

Testing facility: The product has been tested according to the test method specified in the test method of the product under test.

The test is carried out on the basis of DIN EN 12464-1:2015 by the test method specified in the test method of the product under test.

1.1. Results of the test method

1.2. Results of the test method

1.3. Results of the test method

1.4. Results of the test method

1.5. Results of the test method

1.6. Results of the test method

1.7. Results of the test method

1.8. Results of the test method

1.9. Results of the test method

1.10. Results of the test method

The following table contains the test results of the product.

	Test results	
	Test results	Test results / Comments
Test No.	1	100% / 100%
Test No.	2	100% / 100%
Test No.	3	100% / 100%
Test No.	4	100% / 100%
Test No.	5	100% / 100%
Test No.	6	100% / 100%
Test No.	7	100% / 100%
Test No.	8	100% / 100%
Test No.	9	100% / 100%
Test No.	10	100% / 100%

Remarks:

The following test results and test results are together with the test results.

The test results from the test results are together with the test results.

SGS

Report No. 603200201

Reason for Issuance of additional copy(ies) and reporting to you by the facility (or third party):
 The facility is submitting additional copy(ies) of this report to you as a third party, as required under the provisions of the Act.

Additional copy(ies) of this report is/are being submitted to you as a third party.

1. Summary

Date of last incident	P.E. City	County	State	Name of the Company
01/20/2012	Chattanooga	Hamilton	TN	AMEREN

2. Scope & Class Categories

2.1. Transportation or transportation-related Date revised:

☐ **2.1.1. Transportation - commercial**
☐ **2.1.2. Transportation - non-commercial**
☐ **2.1.3. Transportation - passenger transportation**

2.2. Environmental or pollution-related Date revised:

☐ **2.2.1. Environmental - air**
☐ **2.2.2. Environmental - water**
☐ **2.2.3. Environmental - land**
☐ **2.2.4. Environmental - other**

3. Methodological Approach(es) to Incident Investigation/Prevention:
 The facility used the following approach(es) to investigate the incident: **Root Cause Analysis (RCA)**. **Root Cause Analysis** is the systematic process used to determine the causes of an incident, and to identify measures to prevent a recurrence of the incident.

4. Other description:

Description	Enlight	Smart	Alert
Training:	0	0	0

5. Product Safety Data Management/Third Party Data Management/Statistical Data:

Incident Category	Report	Investigation	Prevention
Transportation	1	1	1
Environmental	0	0	0
Other	0	0	0

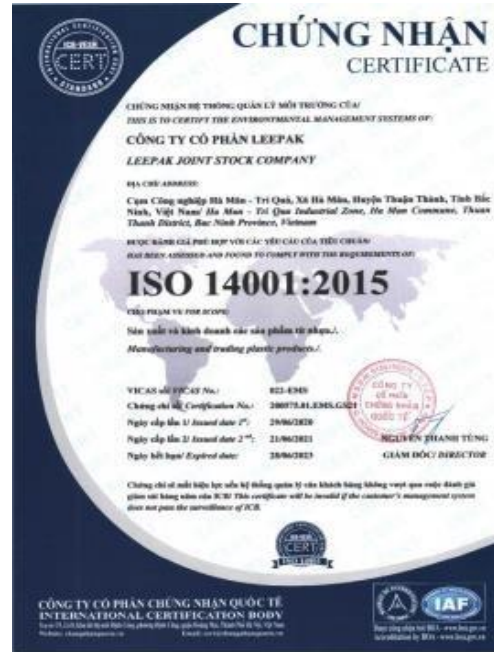

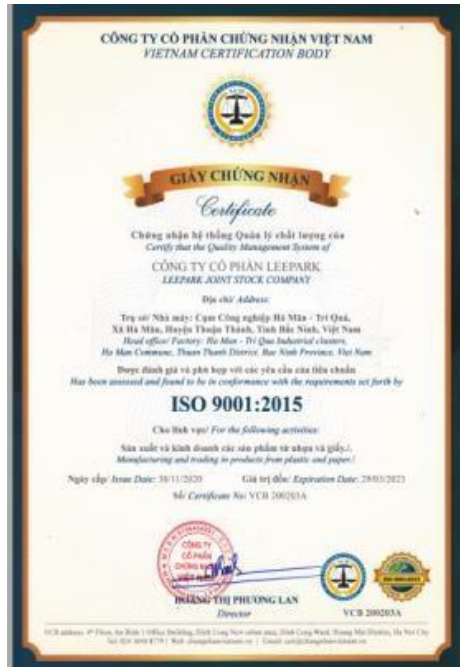

6. Additional Comments:

The incident is a report of an electrical issue. The incident occurred on 01/20/2012 at 10:00 AM. The incident occurred at the facility's electrical control room. The incident occurred while the facility was performing a routine maintenance check. The incident occurred while the facility was performing a routine maintenance check. The incident occurred while the facility was performing a routine maintenance check.

7. Additional Comments:

The incident is a report of an electrical issue. The incident occurred on 01/20/2012 at 10:00 AM. The incident occurred at the facility's electrical control room. The incident occurred while the facility was performing a routine maintenance check. The incident occurred while the facility was performing a routine maintenance check. The incident occurred while the facility was performing a routine maintenance check.
