For you

People want to live more responsibly, and **M.A.I Organics** works to facilitate these lifestyles.

M.A.I Organics was established in 2015 in Hue City, Vietnam with two core members: **Ms. Hoang Thanh Mai** and **Ms. Nguyen Dang Quynh Anh**. The name is based on their vision to bring innovation to traditional agricultural business: **M.A.I Organics (Mai & Anh Innovation)**.

Besides trading in agricultural products and organic food, **M.A.I Organics** has developed an environmentally friendly product line of natural materials which replace plastic products, such as straws and tableware.

With enthusiasm, practical experience and love of nature, **M.A.I Organics** team is confident to bring customers green - environmentally friendly consumer solutions.

ABOUT US

M.A.I Organics originates from love. Selecting environmentally friendly products means selecting your own path. That path is full of love for the planet:

- Love of the nature
- Love of our lives
- Love of our customers as well.

VISION

Our products are born out of our love for nature. These clean tableware products are made with standard and environmentally friendly processes. Customers recognize and appreciate the product's value.

CORE VALUES

At M.A.I Organics, each person plays an important role delivering products from farm to table.

We are well informed about the environment, experts in tableware and knowledgeable about nutrition and health.

M.A.I Organics's goal is to provide the highest quality, diversified products at the best price.

Our Products

Areca leaf plates

Areca leaf plats and bowls are made from fallen areca leaf sheaths. Areca is a very popular plant in all parts of Vietnam. These handmade products are environmentally friendly and safe to the users. Fallen areca leaf sheaths are collected, cleaned and heat pressed. The products are dried and UV sanitized before being packed with PE film (100% biodegradable).

Areca leaf plates and bowls are biodegradable, selected as a great alternative to the single-use plates and bowls today. However, this single-use disposal product may be reusable if only used for serving dry food.

Areca leaf plates and bowls are produced in various sizes, can be used for serving dry, liquid and cold food with a capacity up to 1kg. Liquids may be used in the product for up to one hour.

Sea grape leaf plates

These plates are made from fallen sea grape leaves. Sea grape is a plant in the central coastal provinces of Vietnam.

These handmade products are environmentally friendly and safe to users. Fallen sea grape leaves are collected, cleaned, heat pressed, dried and UV sanitized before packing with PE film (100% biodegradable).

Sea grape leaf plates are biodegradable and a great alternative to the single-use paper and plastic plates used today.

Sea grape leaf plates are produced in various sizes and can be used for serving dry, liquid and cold food with a capacity up to 0.2kg. The product is unmicrowavable.
