IDEA is a company specializing in design outsourcing, machine design, control software, automated manufacturing systems, automated guided vehicles (AGVs) and robots for the Japanese, US and FDI companies.

The board of directors, who have many years of experience working with different Japan companies, graduated from Ho Chi Minh City University of Technology and studied in Japan.

With dynamic and enthusiastic young staffs, IDEA is proud of being able to provide services and products in the field of engineering and technology to the highly demanding markets such as Japan, United States and FDI. Our motto is: Prestige is first. We always highly appreciate the value of the Quality-Cost-Delivery criteria. We are confident to satisfy our clients with our services.

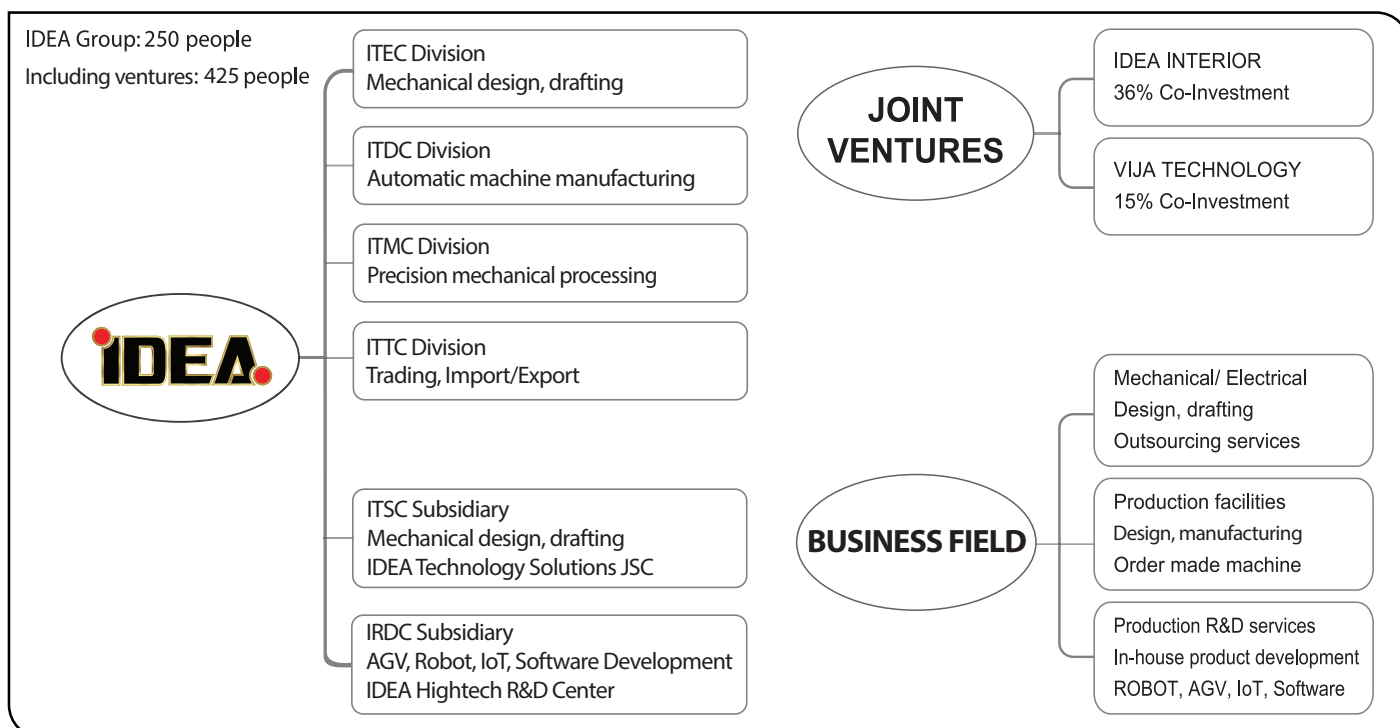

We specialize in various FA, automatic machines, conveyor equipment, precision automatic machines, labor-saving machines, industrial machines, food machines and robot system fields.

Currently, we have more than 210 clients from Japan, United States. We always make our best effort to satisfy our clients.

We also own the machine workshop in order to provide full services of design, machining, assembling and warranty.

Besides, we take full care of research and development and we are investing a large part of our sources for that. Our vision is to become one of the best Vietnamese companies in the field of machine design and manufacturing.

After only 12 years from our establishment, we have built a trust and reputation to many Japan, United States companies. We have been receiving more and more orders and increasing the turnover every year. More to the point, we keep rising the number of engineers along with the development of the company during that 12 years and now, we have 200 well-experienced engineers and technicians who are designing machine for Japan, United States companies and FDI companies in Vietnam.
