

DONGWON GLOVE VINA

Manufacturer & Exporter of Safety Gloves

Welcome to Dongwon Glove Vina, your trusted partner in industrial safety. We are dedicated to providing high-quality safety gloves designed to meet the rigorous demands of various industries worldwide.

OUR VISION

***Protecting Hands,
Empowering Industries
Globally***

Why Choose Dongwon Glove Vina?

1. Premium Raw Materials & Unique Technology

Nitrile & Latex sourced from leading suppliers (LG Chem Korea, Thailand).

2. Advanced Technology

Double baking & special washing for superior durability and skin safety.

3. International Standards

EN388, CE, ISO certified.

Why Choose Dongwon Glove Vina?

4. Tailored Solutions

Customized designs for diverse industries

5. Competitive Pricing

We adhere to stringent international quality standards, with rigorous testing at every stage of production to guarantee durability, protection, and comfort.

6. Smart Touch Function

CNT-enabled Smart Touch applied to NBR, Winter, and Un-Cut Gloves for touchscreen usability.

7. In-House Covering Process

Ensures stable quality and cost competitiveness.

Dongwon Glove Co., Ltd., Founded in 2014, we are a leading manufacturer and exporter of industrial safety gloves with a monthly capacity of over 10 million pairs. From our 30,000 m² state-of-the-art facility in Phu Tho, Vietnam, we deliver certified quality gloves to Korea, Europe, North America, and beyond..

Dongwon Activities.

Key Glove Functions

Mechanical Protection

- Abrasion, tear, and puncture resistance
- Guards against sharp objects and rough surfaces

Thermal Protection

- Insulation against extreme heat and cold
- Essential for tasks in high or low-temperature environments

Chemical Resistance

- Forms a barrier against oils, solvents, and acids
- Prevents skin contact with hazardous substances

Impact Protection

- Cushioning and absorption against blunt force
- Protects knuckles and hands from crushing injuries

Key Products

- **NBR Gloves:** Chemical & abrasion resistant, ideal for machinery, electronics, and precision tasks.
- **Cut-Resistant Gloves:** EN388 certified, perfect for glass, metal, and automotive industries.
- **NR Latex Gloves:** Durable, comfortable, widely used in construction, agriculture, and general industries.
- **Winter Gloves:** Insulated, waterproof, ideal for cold-weather work and outdoor activities.
- **Cotton Gloves:** Lightweight, breathable, eco-friendly for packaging, inspection, and light work.

Common Glove Materials & Their Strengths

1

Nitrile

Offers superior chemical and puncture resistance. Provides excellent grip in oily conditions, making it ideal for automotive, or laboratory work.

2

Latex

Known for its flexibility and tactile sensitivity. Good for biological hazards and offers moderate chemical resistance, common in medical fields.

3

Cut Resistance

Highly durable and abrasion-resistant. Perfect for heavy-duty tasks like construction or welding, offering robust protection and longevity.

4

Poly, Nylon, cotton

Lightweight, cost-effective, and disposable.

NBR Gloves-High Elasticity & Premium Protection

“Comfort – Safety – Natural”

Built for Toughness

Made from **high-elastic nylon fiber** combined with **NBR Latex imported directly from Korea** (from leading corporations such as **LG Chem**), NBR gloves provide **durability, comfort, and maximum safety** for users.

Outstanding durability: excellent resistance to abrasion and chemicals.

High flexibility: perfectly fits the hand without tightness.

Strong grip: NBR coating ensures anti-slip performance, supporting precise handling even in oily or wet conditions.

Ideal Applicatios

Wide applications: ideal for mechanical works, construction, electronic assembly, machinery manufacturing, and many other industries requiring professional protection.

Cut-Resistant Gloves

“Comfort – Safety – Natural”

Built for Toughness

Engineered with **high-strength fibers** and reinforced with advanced coating technology, our cut-resistant gloves ensure **superior protection against sharp edges and mechanical risks** while maintaining flexibility and comfort.

High cut resistance: certified to international safety standards (EN388).

Comfortable wear: breathable material with excellent elasticity, reducing hand fatigue during long use.

Enhanced grip: special surface coating for secure handling in dry, oily, or wet conditions.

Ideal Applications

Wide applications: suitable for glass handling, metal fabrication, automotive assembly, and other industries where hand safety is critical.

Winter-Gloves

“Comfort – Safety – Natural”

Built for Toughness

Made from **premium insulating materials** (feather fabrics) combined with **windproof**, winter gloves provide **warmth, comfort, and all-weather safety** for users..

Outstanding insulation: excellent heat retention, keeping hands warm even in freezing temperatures.

High flexibility: ergonomic design ensures a snug fit while allowing natural hand movement.

Strong protection: windproof and waterproof layers block out snow, rain, and icy winds for reliable performance in harsh winter conditions.

Ideal Applicatios

Wide applications: perfect for daily commuting, outdoor work, sports (skiing, snowboarding, cycling), hiking, and many other activities requiring **warmth and protection** in cold environments.

NR Gloves – Full Coating

“Comfort – Safety – Natural”

Built for Toughness

Made from **Natural Latex imported directly from Thailand** combined with **cotton yarn**, NR gloves deliver **comfort, safety, and durability** for users.

Skin-friendly material: safe for hands, reduces the risk of allergies..

Maximum comfort: soft cotton lining absorbs sweat, ideal for long-term use..

Excellent grip: natural rubber coating ensures strong anti-slip performance.

Ideal Applications

Wide applications: suitable for manufacturing, agriculture, construction, and industries requiring reliable hand protection.

NR Gloves – Yellow Coating

“Comfort – Safety – Natural”

Built for Toughness

Made from **Natural Latex imported directly from Thailand** combined with **cotton yarn**, NR gloves deliver **comfort, safety, and durability** for users.

Skin-friendly material: safe for hands, reduces the risk of allergies..

Maximum comfort: soft cotton lining absorbs sweat, ideal for long-term use..

Excellent grip: natural rubber coating ensures strong anti-slip performance.

Ideal Applicatios

Wide applications: suitable for manufacturing, agriculture, construction, and industries requiring reliable hand protection.

Cotton Gloves (40G,45G,50G,60G)

“Comfort – Safety – Natural”

Built for Toughness

Made from 70-80% **natural cotton fibers**, cotton gloves provide **softness, breathability, and all-day comfort** for users in light-duty applications..

Natural softness: gentle on the skin, reducing irritation and suitable for sensitive hands.

High breathability: allows air circulation, preventing sweat build-up and keeping hands dry.

Eco-friendly choice: biodegradable cotton makes it a sustainable and environmentally friendly option.

Ideal Applications

Wide applications: perfect for light industrial work, inspection, packaging, assembly, gardening, household chores, and as inner liners for other protective glove.

Our Commitment to Innovation

R&D Excellence

Our dedicated R&D team continuously explores new materials and technologies to enhance glove performance, durability, and user comfort.

Sustainable Practices

We are committed to eco-friendly manufacturing, optimising resource utilisation and reducing our environmental footprint through sustainable material sourcing.

Certifications & Compliance

All our products meet stringent international safety standards, including CE, and ISO certifications, guaranteeing peace of mind for our clients.

The Dongwon Advantage: Partnership for Safety

Tailored Solutions

We understand that every industry has unique safety requirements. We offer customisation options and work closely with clients to develop bespoke glove solutions that perfectly align with their operational needs.

Competitive Pricing

Leveraging our efficient manufacturing processes and strategic location in Vietnam, we provide highly competitive pricing without compromising on the quality or integrity of our products.

Exceptional Customer Support

Our dedicated team provides comprehensive support from inquiry to after-sales service, ensuring a seamless and satisfactory experience for all our partners.

•“Your safety is our mission.”

Global Network & Support

- Exporting worldwide: North America, Europe, Asia.
- Dedicated support from inquiry to after-sales service.
- “Your safety is our mission.”

Let's Connect

We invite international buyers and procurement managers to explore a partnership with Dongwon Glove Vina. Discover how our superior safety gloves can enhance worker protection and operational efficiency in your organisation.
